

**Radiation Protection Workshop**  
**DOE Forrestal Headquarters Auditorium**  
**Washington, D.C.**  
**November 1-3, 2005**

The DOE Office of Worker Protection Policy and Programs is planning on holding a Radiation Protection Workshop to provide a forum for the open discussion of critical radiation protection hazard control issues faced by line managers, facility engineers and safety and health professionals.

DOE's Radiological Control Coordinating Committee (RCCC) and the Occupational Safety and Health sub group of the Energy Facility Contractors Group (EFCOG) are assisting in identifying speakers to present a variety of topics relating to radiological hazards and controls.

If you wish to make a presentation or have a suggestion for topics to be covered please contact your RCCC or EFCOG member before July 1, 2005. The RCCC members are listed at: (<http://www.sc.doe.gov/sc-80/rccc/rcccmembers.shtml>)

Or you may directly contact [Peter O'Connell](#).

The Workshop's format will include in-person and televideo attendance, allowing for the greatest participation from across the complex, with two-way remote interaction. If your site is planning on establishing televideo networking for this conference please provide [Peter O'Connell](#) with the: site name, radiological control and televideo points of contact (name, e-mail, phone, fax). Please provide this information by October 1, 2005.
